**EXAMINER'S AMENDMENT**

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Art Unit: 3737

Authorization for this examiner's amendment was given in a telephone interview with Michael C. Barrett on 15 December 2004.

The application has been amended as follows:

In claim 17, line 9: delete "and".

In claim 17, line 10: delete "." and add --; and--

In claim 17, add line 11: --localizing the scattering of the optical medium.--

4. The following is an examiner's statement of reasons for allowance:
5. The prior art does not anticipate or render obvious a system for measuring scattering of an optical medium comprising a device which acquires a plurality of point spread functions of the medium, a memory to store the point spread functions and a microprocessor that performs instructions to determine the component of the point spread functions due to the optical aberration and the component of the point spread functions due to scatter, and wherein the microprocessor localizes the determined scatter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The filing and entry of the Terminal Disclaimer regarding U.S. Patent # 6,659,613 overcame a possible rejection under obviousness double patenting since both sets of claims require acquiring a plurality of point spread functions of an optical medium comprising components due to optical aberrations and scatter and wherein each component is determined.
